

Blockchain Developer at Greenfinch Global Consulting JD

Are you passionate about blockchain and ready to build the future of decentralized tech?

Join us at Greenfinch Global Consulting and work on game-changing blockchain projects with a team that values innovation and agility.

Location

Jaipur (Work from Office)

Experience

1 to 3 Years

Employment Type

Full-Time

What You'll Be Doing

- Architect and maintain scalable blockchain networks & dApps using modern frameworks and protocols.
- Develop and deploy smart contracts on platforms such as Ethereum, Hyperledger Fabric, and Corda.
- Collaborate with cross-functional tech & product teams to deliver robust blockchain solutions.
- Implement secure cryptographic protocols and ensure best practices in security, privacy, and compliance.
- Explore and optimize solutions for performance, scalability, interoperability, and consensus mechanisms.
- Utilize up-to-date tools such as Truffle Suite, Hardhat, Foundry, Remix IDE, Web3.js, Ethers.js, and Brownie for efficient development, testing, and deployment.
- Engage in rigorous testing and debugging using advanced frameworks and personal blockchain environments (e.g., Ganache, Hardhat).
- Stay current with industry advancements and contribute to the adoption of new tools, standards, and best practices.

What We're Looking For

- 1–3+ years of hands-on experience in blockchain development.
- Proficiency in: Solidity, Go, Python, C++, or JavaScript/TypeScript.
- Experience with: Ethereum, Hyperledger Fabric, Corda, or similar DLT platforms.
- Solid understanding of: distributed ledger technology (DLT), smart contract lifecycle, consensus algorithms, and cryptography fundamentals.
- Familiarity with: RESTful APIs, Web3 integrations, and cloud platforms (AWS, Azure, GCP).
- Strong problem-solving skills and ability to work in agile, cross-functional teams.
- Excellent communication and documentation abilities.

Bonus Points For

- Experience with Polkadot, Solana, Truffle Suite, Foundry, or Brownie.
- Familiarity with Layer 2 solutions (e.g., Optimism, Arbitrum) and cross-chain interoperability.
- Contributions to open-source blockchain projects or active participation in the blockchain developer community.
- Experience with security audits, code review, and best practices for smart contract security (e.g., OpenZeppelin).
- Knowledge of NFT standards, DeFi protocols, and decentralized identity solutions.
